

Carbon Projects Coordinator

Job reference: REQ0588

Location: Inverness/Edinburgh

Salary: £30,427 - £32,615

Job description

Forestry and Land Scotland is looking for an organized and pro-active project co-ordinator to join our national carbon projects team.

This is an exciting and varied role supporting an emerging programme of partnerships for climate and biodiversity at FLS. This maternity cover position will pick up an established portfolio of Woodland Carbon Code and Peatland Code projects on national land across Scotland – from Highland glens to remediated coalfields, intricate riparian woodland networks to vast upland blanket bogs – all at various stages of development.

The role is an excellent development opportunity, where you will be working with a range of experts within FLS national and regional teams as well as external stakeholders to take projects through scoping, registration and validation to the carbon codes.

Location is flexible – you will be working from home or one of FLS' many offices, with some travel to woodland creation and peatland restoration sites across Scotland and FLS national offices in Inverness/Edinburgh.

Candidates should be chartered or working towards chartered status.

If this interests you, please see the job description and Success Profile for a full overview of the role and link to apply.

Closing date: 28 May 2023.
